Auditing

We conduct audits of management system to ensure compliance with ISO 9001, AS 9100, ISO 14000, ISO 17025, ISO/TS 16949, SA8000, OHSAS 18001, etc, and many kinds of audit for compliance with international standards for products, materials and systems.

Our Service is developed in accordance with the approved plans of clients and their established policies and procedures.

LEVER UP CONSULTING SRL offers an auditing service of 1st, 2nd and 3rd part, complying with the ISO 19011:03 Guidelines for quality and/or environmental management systems, Codes of Ethics and any international standards that may be applicable to the performance requested by the client.

LEVER UP CONSULTING SRL's auditors apply a methodology of analysis and appraisal that goes beyond a simple audit of compliance, but is oriented to find correspondence to accepted best practice, management of processes and business excellence in accordance with the needs of clients.

Innovation and Technology Transfer

Lever Up Consulting srl provides organisations with new insights into the opportunities presented by technology enabled innovation. We help companies achieve business breakthroughs through opportunity identification, new business creation, strategy development and new product, service and category innovation.

Our objective is to 'push' the client in the direction of global organizational innovation processes and build sustainable innovation capability by addressing strategic, organizational and cultural challenges through an optimized use of technology.

Our innovation methodology is a three step process:

The assessment (Technology check-up): we will begin by carrying out an assessment of the current technology usage in the business and identifying the key issues, strengths and weaknesses relating to its current use activities. For most businesses, the process can be completed within one or two days.

The plan: based on this analysis, the Advisor will work with the owner/manager to outline a clear, action orientated and realistic strategy aimed at developing and deploying appropriate skills and systems within the business with the objective of delivering real and sustainable competitive advantage. The plan will focus firstly on better usage of the technology already owned by the business before recommending further investment in new technologies where it is necessary.

The implementation: we will assist our client through all the following phases of implementing and monitoring the changes and 'making the plan a reality'.

At LEVER UP CONSULTING SRL we act as technology brokers assisting the transfer of knowledge from other companies or research centres, wherever the technology is available.

In addition we offer tailored advice to identify the appropriate funding stream for research and innovation.
